OZKAN

// about us

Our History

Özkan Kundura ve Lastik İmalat Sanayi ve Ticaret A.Ş., started its operations as a shoe store in 1954, has become one of the largest manufacturers of military, police and work safety shoes in the Turkish footwear industry over the years.

With the foundation of Özkan Teknik Emniyet Malzemeleri Sanayi ve Ticaret LTD Company in 1987, marketing activities started in addition to private label production.

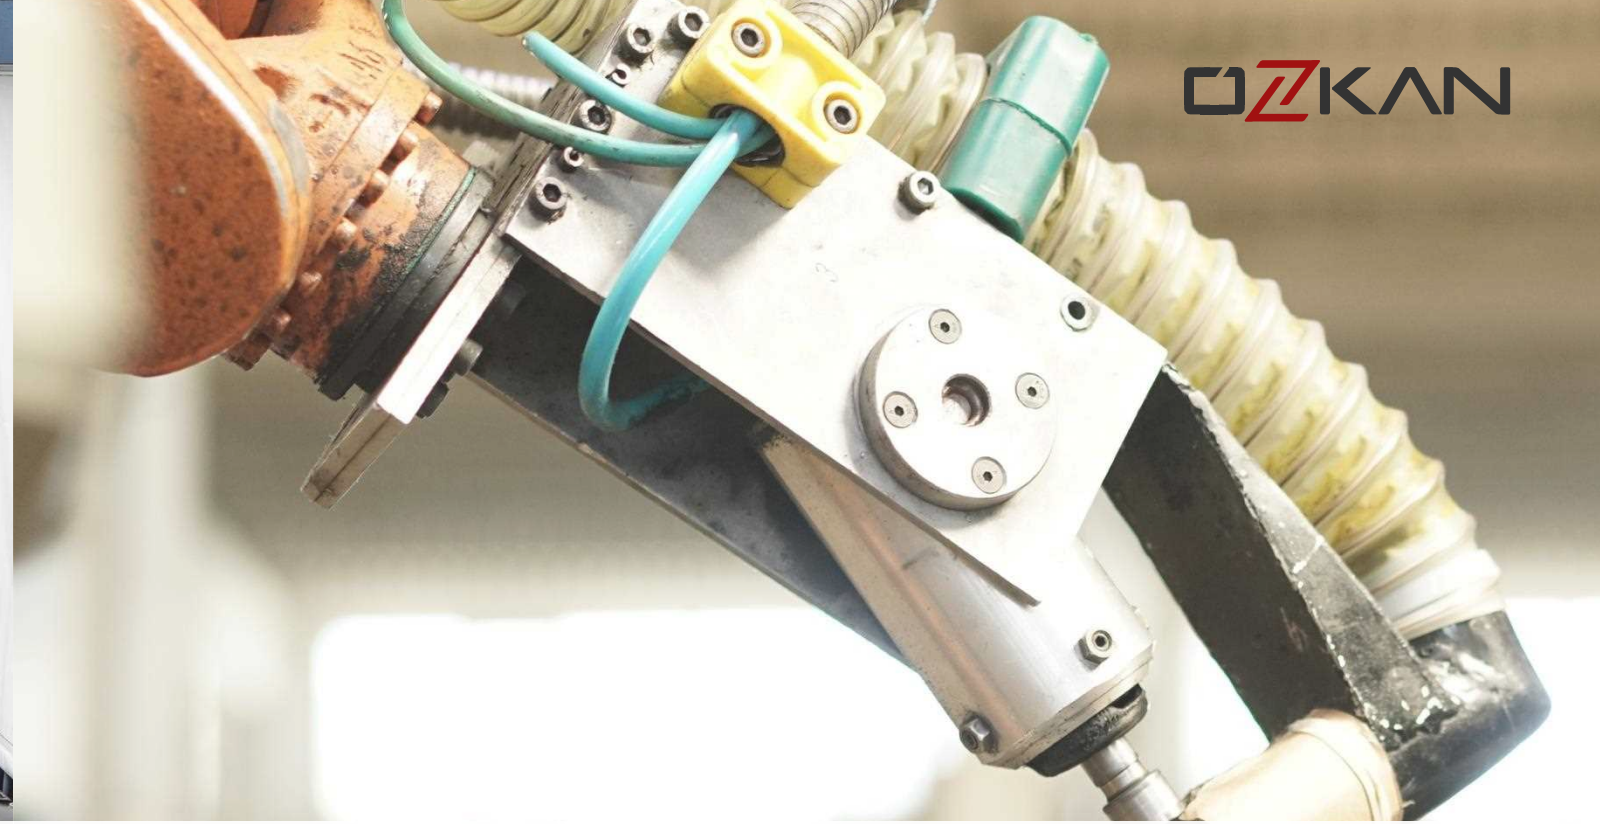

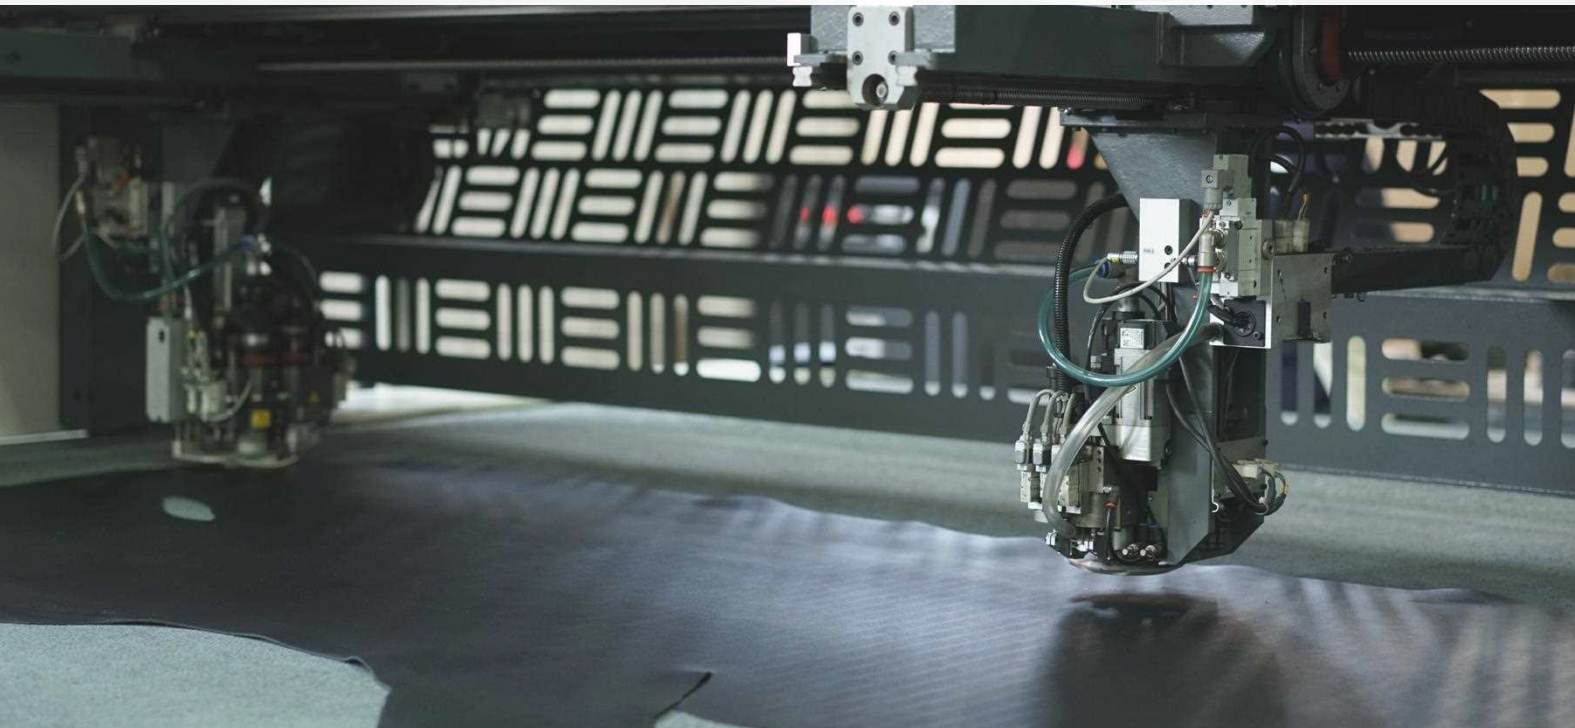

Production

Our production started in 1978 at Gedikpaşa moved to Bayrampaşa in 1981 and since 1995, it has been done in our production facility with a closed area of 13.000 m2 in Tuzla Leather Organized Industrial Zone, Istanbul.

With more than 150 personnel, 5 injection machines and robotics technology, the annual production capacity has exceeded 1,600,000 pairs.

Technology

In our facility, TPU/PU and PU/PU double density injection, single and double color rubber injection and goodyear welt production methods are applied.

In addition, since 2004, GORE-TEX® licensed products have been integrated into our production.

The new Standard for Safety Footwear EN ISO 20345:2022 is in place.

The table below shows the new categories and requirements the new standard brings.

EN ISO 20345:2022																
SB	●	●	●	●	●	●

* Different from 2011, as of the 2022 Standard, Slip Resistance will be indicated with SR.

** Different from 2011, as of the 2022 Standard, Resistance to Hydrocarbons is only mandatory in SB category.

*** Different from 2011, as of the 2022 Standard, Puncture Resistance material and level will be indicated with 3 different signs.

requirement	icon	description
basic requirements		Impact Resistance
		Footwear Ergonomics
		Vapor Permeability
		Durability and Technical Performance of Materials
		Slip Resistance
WPA		Resistance to Water Penetration of the Upper
A		Antistatic Footwear
E		Energy Absorption in the Heel Area
P		Puncture Resistance with Metal Insert
PL		Puncture Resistance with Non-Metallic Insert with 4.5 mm Nail
PS		Puncture Resistance with Non-Metallic Insert with 3 mm Nail
FO		Resistance to Hydrocarbons
CI		Thermal Insulation at Low Temperatures
HI		Thermal Insulation at High Temperatures
HRO		Resistance of the Sole to Contact Heat
WR		Water Resistant Footwear

FIBERGLASS TOE-CAP

// strong as steel, light as plastic //

The protective toe-caps used in our safety footwear are made of Fiberglass material which is lighter and more flexible than steel.

The non-magnetic and thermal insulating characteristic of the material are additional advantages to user.

Fiberglass toe-cap increases comfort with its thickness as low as 6.5 mm, leaving more space in the footwear. Also the rubber tape at the open side of the cap prevents any contact to foot.

Fiberglass toe-cap also meets the impact resistance criteria EN ISO 20345 and EN ISO 22568 standards ask with more precision than regular composite toe-caps.

KEVLAR MIDSOLE

In our safety footwear, puncture resistance is secured with KEVLAR lining midsole instead of steel plates. The midsole which complies with the EN ISO 20345 Standard, prevents any kind of penetration of a nail width of 4.5 mm and a force of 1100 Newton.
